

## Panel mounted inlet

Part no. 75326

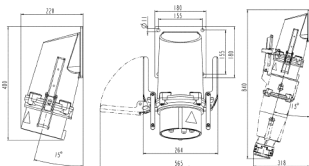

- 15° inclination
- seawater resistant design are available on request

## Technical specifications

|                       |                 |
|-----------------------|-----------------|
| Ampere                | 250 A           |
| Poles                 | 5 p             |
| Voltage               | 400 V           |
| Clock position        | 6 h             |
| Hertz                 | 50-60 Hz        |
| Connection technology | Screw terminals |
| Contact               | standard        |
| Protection type       | IP 67           |
| Weight                | 8500 g          |
